

Abdallah Abedraba

Seville • +34611159343 • a@abedraba.com • linkedin.com/in/aabedraba

Engineer with 8+ years building production systems at scale, and strong public speaking skills. Experience from IC roles to leading 10-person teams. Proven track record in developer tools, API infrastructure, and open-source projects.

Skills: Kubernetes, GCP/AWS/Cloudflare, Serverless, GraphQL/REST, PostgreSQL, React, React Native, agentic architectures.

WORK EXPERIENCE

NGOs

Voluntary Work

05/2025 – Present
Seville, Spain (Hybrid)

- Built education infrastructure for AI-Andalusia University, including LMS integrations and marketing systems supporting a €1.4M funding round; mentored a team of 3 engineers. (Next.js, WordPress, Stripe).
- Shipped a cross-platform mobile app for Halaly, helping Muslims find local services; 1,000+ downloads in the first week. (React Native, Firebase).

Producta.ai

CTO, Co-Founder

06/2024 – 05/2025
Seville, Spain (Remote)

- Built AI coding agent with novel multi-agent architecture replacing RAG with file summarization and layered code search; improved PR success rate from 50% to 80%.
- Architected agentic pipeline: input validation layer, multi-stage code search, expert model routing for complex tasks, and automated PR generation with GitHub integration.

Zuplo

Staff Developer Relations Engineer

05/2023 – 06/2024
Dubai, UAE (Remote)

- Led Go-To-Market strategy including conferences, partnerships, paid ads, and technical content.
- Built open-source Rate-My-OpenAPI tool (400 stars, 10k+ reports generated).

Kubeshop

Product Leader

11/2021 – 05/2023
Dubai, UAE (Remote)

- Led engineering (10 reports), technical roadmap and architecture, building open-source dev-tools like Testkube (Kubernetes test runner) and Kusk (API Gateway).
- Built serverless API gateway based on our Kuberentes offering, matching feature parity in 1 month, leveraging V8 isolates and edge architectures.

GreenMobility

Fullstack Developer

10/2019 – 11/2021
Copenhagen, Denmark

- Architected and built the platform from scratch, delivering 2 consumer applications and scaling high-throughput systems (2M events per day) on serverless infrastructure.
- Shipped features every day to 200k customers and built internal portals to manage fleet of 600 cars.

Google

Developer Relations

09/2018 – 10/2019
Madrid, Spain

EDUCATION

BS Computer Science

Universidad de Jaen

09/2015 – 07/2018
